PedalDonw Lo 1	
Piano Acous Hall	
Piano Acous Hall 2	
Piano Acous Room	

Scripts:

These must be located in the default Kontakt 2 installation directory under Presets/Scripts/PMI

- HOLY GRAIL: This script generates the extra sustain, hammer and release and sustain pedal noise for the Hybrid Holy Grail AddOn. .
- 9 overtones enhancement: Insert in a second piano file, it generates the first 9 overtones (sympathetic resonance only.)
- Kornel Symp Res Special: special Sympathetic Resonance script from Kornel Mezo
<http://music.mezo.com/>
- Piano Pedals: Adds 3 pedals (soft pedal, sustain pedal and sostenuto pedal).
- Piano release mode & half pedal: Script emulates real string
- Self Mask: avoids double notes when you play the same note at the same velocity
- Machine Gun Killer: Special trick to avoid the Machine Gun effect when you repeatedly retrigger samples.
- Velocity curve: a utility to adjust the velocity scaling of your instrument.
